

**WMAHSN-59a Reminder to make an appointment for another prescription for the contraceptive pill (10 ½ months)**

Purpose: To remind women to return for a review / replacement of their contraceptive pill before the supply of contraceptive that the patient has is exhausted.

Summary of protocol :

Four weeks before the 12-month supply runs out, the patient is texted to make an appointment, and is reminded up to four times. In order to stop reminders, the patient has to text the word 'PILL' to indicate that they have made their appointment.

Day 315 at 12:00

***Hi. It's time to see the nurse to arrange for another prescription for the contraceptive pill. Please text PILL when you've made an appointment. Thanks, Flo***

Every 4 days for 16 days:

***Hi. Please remember to make an appointment to see the nurse about your pill, and text PILL when you've done so. Thanks, Flo.***

When they text PILL:

***Thank you for making the appointment. We look forward to seeing you***

The protocol expires after this message, so when the patient attends, they will need to be set up on the protocol again.

**WMAHSN-59b Reminder to make an appointment for another prescription for the contraceptive pill (5 months)**

Purpose: To remind women to return for a review / replacement of their contraceptive pill before the supply of contraceptive that the patient has is exhausted.

Summary of protocol :

Four weeks before the 6-month supply runs out, the patient is texted to make an appointment, and is reminded up to four times. In order to stop reminders, the patient has to text the word 'PILL' to indicate that they have made their appointment.
